Who says that you have to pay a lot of money to get everything you want? The only thing you have to do is to look at the free version of the new file manager and download this handy little application. With this software, you can easily and effectively manage and back up your files on the hard disk. It is both an organizer and a file manager. There are some neat tools that come with this software such as an options, a backup manager, a split view, a delete manager, and more. If you are on a Mac, you may want to give this software a try. Features: Portable RSS feed support Split view Task view Delete manager Split window view Size handling Import/export Selective sync Import to Folder ZIP file support Backup manager Video preview Email notification URL/IMG preview Trash Startup manager Control over processor priority Notes RSS feed support: Use RSS feeds to view your favorite online content. For example, you can subscribe to a news website and you can automatically see your favorite news headlines in the RSS window. Split view: In the split view, you can use two independent windows, each for a different purpose. Use them to edit multiple files at the same time, or use the split view to display the folder contents in two separate windows. Task view: The task view window can be used to display the contents of selected folder or subfolder. It is similar to the project window in some other project management software. Delete manager: You can use this tool to easily delete files from your computer. It is great if you want to eliminate files that you don't need anymore. Split window view: In the split window view, you can display two windows in a single screen. You can use this window to view a folder's contents and the associated.zip file. Size handling: This is one of the features that I like most about this software. You can manually or automatically resize the folders. You can use the size handling window to set the folder's size and directory. Import/export: With this feature, you can import, export, and move files between your computer and your network. You can also use this to back up
