Kakku ehk Kapu dieldi! Get Data On Your Smartphone! Listening To Your Favorite Radio Stations With Bluetooth & WIFI Speakers! What's new HELP: android.process.media is changed to android.media. Just to let you know, the class android.media.MediaPlayer is added in API 16, so you need

to add a newer version of playerv library. Thanks for your help, Kajan! Hi Kajan, Can we have the version number of the playerv library? I have updated to version 2.4.0. After updating I get the following error message: Caused by: `java.lang.NoSuchMethodError: android.content.Context.getPackageName` Thank you for your time. Bogdan Stefan Hi, thanks for your reply. Version 2.4.0. Unfortunately I still get this error message. I also added a log: and it says: 02-22 16:49:00.241: I/Camera(10966): Camera access violation, code 3 The following bug has been fixed: Bug #122 In the PlayService implementation of the app MediaPlayer, the following line of code was commented: `String packageName = context.getPackageName();` The error message should have been easier to identify. Now, the error occurs when the MediaPlayer is created. Thanks for your reply. Bogdan Stefan Hi Bogdan, Do you know what is the code you are referring to? I cannot find the place where that part of the code is located. Thank you for your time. HELP: `android.process.media` is changed to `android.media`. Just to let you know, the class `android.media.MediaPlayer` is added in API 16, so you need to add a newer version of playerv library. Thanks for your help, Kajan! Hi, in my log I got this: 08-05 08:55:51.213: I/MediaPlayer(3104): info/warning: unsupported url for In Android 4.3 this happens, if you use the playerv library 77a5ca646e

If you're having a moment of thought and are wondering what life is like further up north, in or around the Baltic region, then Radio Estonia is an application that can at least partly give you an answer. With this application, you have access to Estonian radio as if you were actually an Estonian individual. It runs smooth and fast while delivering a truly unique cultural experience. Don't dismiss something from the start just because it has the word "radio" in its title. It's not old fashioned and it's not useless either. On the contrary, Radio Estonia could be the necessary link that needs to be created between the rest of the world and Estonia. You won't get to hear only music. What you get with this app is a full experience. Nothing Estonian will ever be a mystery to you, anymore. You can listen to talk shows or various types of performances. No matter where you tune in with this app, you'll be indirectly schooled on Estonian issues and perspectives. Using the app will seem like a breeze Why is it so easy to operate this app? The answer is simple. Radio Estonia does not have a lot of features. The developer of the app did not make it a priority to enrich this app with options and settings. Instead, the app was probably thought out as a link to a different culture than ours. The result was a program with a simple and intuitive interface. The only thing you can

do here is select your radio and save it in a favorites list if you so wish. Thus, Radio Estonia is an application worth anybody's time. It's enough for one to be either interested in different cultures or more precisely in the Estonian culture. Such an individual will immediately warm up to Radio Estonia and will, as a result, be introduced to the vast history of the Estonian people and culture. This is a very good app if you are using Android 4.0.3 and above or iPhone 6s. But, this app is very bad for use if you are using Android 2.3.7 and below or iPhone 5S. It can't receive the state of Google Play in your phone. OK, I can now accept this app. I would not have the program installed if I had not been asked to do it. But I would like to give some constructive feedback. It is very easy to work with and the result is not bad at all. My only concern is the fact that the audiobooks which I have downloaded from the
