Unlike other image editing programs, Photoshop's editing features have undergone numerous changes and additions, making it a powerful, versatile program. History [edit] The name of the software, Photoshop, is a portmanteau of "photo" and "software." The name's popularity is attributed to a marketing campaign in the 1990s.[6][7] The earlier name PhotoShop was a registered trademark, and many people were confused by the similarity in sound. However, it is not the name of the company that created the software.

The name Photoshop was originally intended to be the name of the company that would manufacture the software, but "Photoshop" was already the name of a highly popular cross-platform graphics editor by Thomas Knoll.[8] Its first commercial release, Adobe Photoshop, was actually "Photography Program," and the logo included the silhouette of the CN Tower. The C and N were removed and Photoshop was added to avoid trademark complications.[8] The first version of Photoshop was released in 1987. It was called "Photomerge" in 1988, and thus, Adobe named the first version "Photoshop 1.0". The release was published on August 27, 1992. The first CD-ROM version was released on October 16, 1994.[9] In 1995, the first version with multi-resolution support was released, and in 1997, a layered editing system and an outline mode were introduced. Also in the same year, Photoshop 7.0 was released with a redefined user interface. In 1998, features like layer groups, Smart Objects, Smart Filters, and a brush engine were added. In 1999, the multiline text feature and the Live Paint feature were added. The black color in the versions after 7.0 is a feature found in Illustrator, a commercial design program. Version 7.1 introduced the Brush Width feature. Version 7.5 introduced Smart Filters. Version 7.7 introduced the Reduce Noise feature, followed by the Reduce Chunks

feature in 8.0. Version 8.0 introduced Content-Aware Fill, and in 10.0, the Dodge and Burn tools were added. 10.0 was the first version where the default mode was Full-screen, instead of Window, when opening a file. The release of Adobe Photoshop CS in 2001 marked a turning point in the history of Photoshop and its development

The organizers of the 2006 Vancouver Winter Olympics are doing what many other cities around the world have done: trying to determine whether the Olympics impact crime in a city. The organizers are partnering with the Vancouver Police Department, the Vancouver Board of Trade and the city's public health department to survey British Columbians after the city held the first Winter Games. Brian Hostess, of hosting committee Vancouver 2010, says the Games are largely tourism-driven, but organizers want to make sure the Games leave as positive a mark as possible. "We think that through sports, through the Olympic medal and podium finishers, we're actually going to do what we set out to do which is lift the city up," Hostess said. The survey was sent out to B.C. residents. Vancouver 2010 put out a statement Monday saying, "as we make a final decision on 2014, we want to make sure that we leave Vancouver a better place for our next generation, both in terms of economic opportunities and in terms of community safety." Vancouver 2010 said they will release their findings in late November. "It's just one more tool in the toolbox," Sgt. Brian Montague of the Vancouver Police Department said. The Vancouver 2010

organizers are paying attention to crime trends before and during the games. "As soon as the Games start, the crime drops," Hostess said. Police are becoming more aware of growing drug problems in Vancouver. Police are also expecting an increase in crime during this summer's Pan American Games. "The summer is traditionally a little bit of a lull, so we've already seen some increase in things like robberies, assaults, theft, that kind of thing," Montague said. Montague said that while crime was down during the Olympics, he does not want to be comparing any two-month span of crime in Vancouver. "You're always going to have crimes here, even during the Olympics, because of the drug element." Montague said people often make comparisons between crime trends before and during the Olympics. The American city of Boston had a similar problem after hosting the Boston Olympics in 1972. The crime rate went up more than 20 percent. Montague and Hostess say crime is not tied to people coming into the city for the Olympics. "In the downtown
