Moo0 SystemMonitor is a system information tool that displays a great amount of details concerning your computer right on the desktop. If there's something to be praised about Moo0 SystemMonitor, that's definitely the long list of supported system resources. The program can show you everything you want about your computer and it's only up to the user and his needs how much information he wishes to see on the desktop. To give you an idea of Moo0 SystemMonitor's long spec list, here are some of the fields that could be displayed on the desktop: CPU (with each core available separately), CPU loader, CPU temperature, fan speed, memory, used and free memory, memory swap, memory loader, HDD usage, each drive usage, network traffic, each network adapter statistics and many others. The desktop look isn't quite an appealing one, but it can be further customized by right clicking it. You can change not only the layout, with multiple predefined profiles available, but also transparency and even the size. What's more, Moo0 SystemMonitor supports skins too and it integrates quite a long list of built-in themes. Obviously, you can configure the refresh frequency as well, with dedicated options to auto hide the desktop window or to keep the program running in the Windows System Tray. On the good side, Moo0 SystemMonitor provides all these details without stressing up the CPU and RAM at all, remaining friendly with hardware resources all the time. All things considered, Moo0 SystemMonitor is one top product, especially thanks to the long list of features it provides. A few improvements in the interface department and it could easily become a very popular app. Limitations: The program is closed source. There's an XBMC Skin available. Main features: Offers a wide range of system information. It's a very easy-to-use app, offering great flexibility to the user. It provides very comprehensive stats and detailed info on system resources. Unsurprising interface. Comes with a lot of predefined themes to choose from. Moo0 SystemMonitor Screenshots: Moo0 SystemMonitor System Information Publisher's Description Moo0 SystemMonitor is a system information tool that displays a great amount of details concerning your computer right on the desktop. If there's something to be praised about Moo0 SystemMonitor, that's definitely the long list of supported system resources. The program can show

The system monitor that shows you everything you want to know about your system. All system resources are displayed on a single dialog with multiple layers. Moo0 SystemMonitor is the perfect tool for monitoring your system **DISCLAIMER:** AutoMooing is the official site of E-Mooing - - a free, automatic, fun and easy to use program for automating Windows desktop. AutoMooing is a one-of-a-kind customizable window manager. Use it if you want to completely customize your Windows interface. No configuration is needed. **FREQUENTLY ASKED QUESTIONS :** Q : I am interested in knowing which windows are the most used? A : Moo0 SystemMonitor provides a great amount of details about each windows. Each process is ordered by its importance or by the amount of screen space it is consuming. Clicking on it displays an icon of the program using the full resources of the computer (speed, RAM, CPU, etc.) Q : Where do I find the complete list of all the Moo0 window types? A : Right click on the screen to display the properties of the desktop, and the window list will appear. A similar list will appear when you click on the Windows Taskbar. Q : How do I restore the default Windows configuration? A : Right click on the desktop to display the properties of the desktop, and select the Reset button. It will bring you to the windows control panel. Q : I know I can limit the space where the widgets are displayed, but I would like to restrict them to the windows titlebar only. How can I do this? A : You can limit the space where the widgets are displayed by right clicking on the desktop, then select the option : 'Desktop settings'. Click on the 'Window Layout' tab. Select the option 'Limit widget size', and place the sliders at the required position. Q : I want to make the desktop background transparent, and have widgets on top of it. How can I do this? A : Unfortunately, you can't. If you want to do it, you will have to look for another program. Q : Is there any way to increase the refresh rate of the desktop? A : Yes. Right click on the desktop to display the properties of the desktop, and click on the option called 'Desktop properties'. Under 'Desktop refresh rate', select 'More Info'. Q : How can I move the widgets around on the desktop

What's New in the?
