Even if it has very few of features, it really works. As it has to be a kind of copy, it lacks features like secure discs or much more advanced configuration. Still, it fulfils the goal it sets for itself, which is to be very simple to use and at the same time satisfy pretty much any user. Included features: Video DVD Duplicator does not support any kind of secure discs and it does not allow you to copy any kind of file with the help of folder configuration. The only thing you get is to pick a source drive, which is usually your internal DVD drive, and a target drive, which is usually the first external hard drive you connect to your computer. That's it. Nothing else. No advance settings, and no advanced DVD copy features. When you are on the destination drive, you can decide to check the key status for every file or check a file's key status. You can also adjust the time of the backup and set the program to perform an automatic backup. As for the copying itself, you can choose between copying audio only, audio and video or audio, video and subtitles or all of them. ## Video DVD Duplicator Crack + Free Download

Video DVD Duplicator is a very simple software solution developed to create a full copy of a DVD disc with minimum user input. There are many other similar products on the market and most of them comprise tons of features supposed to enhance this process, but Video DVD Duplicator is completely different. At the first sight, it seems like an app aimed at beginners because it simply comprises a very small number of features and almost no configuration settings. The window you see after launching the program is the one that takes care of the entire job, requiring users to pick the source drive with DVD and the destination device. It shows just a bunch of stats, such as key status, title key and file status, and provides access to a single option concerning the temporary folder. Video DVD Duplicator was designed to be very fast, but it didn't really impress during our testing. What's more, it also used a moderate amount of resources, which is fairly bad news for those using older workstations. The application doesn't allow users to select the DVD content they wish to copy, but instead it automatically duplicates languages, subtitles, chapters and any other file that may exist on the source disc. Overall, Video DVD Duplicator does its job, that's true, but it simply lacks too many important features. Rookies may be delighted with such an application, since it requires just a few clicks, but professional users definitely need much more advanced features. Video DVD Duplicator Screenshot Video DVD Duplicator Requirements: Size: 0.8 MB Rating: Minimum:2.0 (most users) OS: Any (Windows) Screenshot of Video DVD Duplicator: Video DVD Duplicator Free Download: Free application from ARTASUN to help you to create a full copy of a DVD disc with minimum user input. Video DVD Duplicator Manual: In any computer system, there is always a loop that begins after it is powered on and it continues until you close the application that started the process. For example, you can't open the DVD Player application if you have just burned a CD for playing your favorite music, because it is a loop. The loop begins after the computer was powered on and it runs until the user closes the application that has created the loop. If you forget this operation you will find that the computer freezes and must be rebooted. The same thing applies
