Kingdoms of Europe is a strategy game in which you command the armies and navies of the most powerful European countries in the seventeenth and eighteenth centuries. Your goal is to defeat your opponent to gain control over a territory big enough to support your growing nation. Key Features: A Grand Strategy Game with Diplomacy, Politics and Intelligence in One Save your country from the Spaniards or invade your neighbor's country, depending on which side you're on. Pit your neighbour against you to go up the greatest European power ladder! Players compete with all of their neighbours to become Great Powers of Europe. In the long term, players can pursue one of the eight strategies as they build their empire. Develop different technologies to improve your army and navy in order to take control of the world. Eight Technologies of each player's country: Politics, Economy, Science, Military, Adeptyc, Political Theory, Scientific Discovery, and the Emperor's Support. Educate and research! Gain gold by teaching students, research technology or organise a university to train your youngsters. Innovate! Witness the first invention of a new technology: the lathe, the printing press or the steam engine. Lead a country! Triumph over rival nations to become the ruler of Europe and change the map of the world! Intuitive gameplay to learn in a few minutes, with no complex set-up or rules to learn. A level system, with the single goal of conquering the world. Unlock other historical maps of Europe, from the Great War of the First World to the Scramble for Africa, to unlock new technologies and provide an historical and geographic context to your conquests. The game is being developed in a series of dedicated issue in french on gamepress.Q: How can I use Marshal(T) and Unmarshal(T) in methods as arguments? I'm converting some code to use a custom JSON marshaler and unmarshaler. My unit test hangs and fails with "The type 'T' must be assignable to the type 'T'". I've run into the issue of type params and inferred type params. My code is below (with Minimal, Reproducible Example comments and full working code at github). Given that I've marshaled and unmarshaled a type of T as JSON before, how do I properly marshal/unmarshal into/from the same type? using c9d1549cdd

Your task, as the last surviving member of a squad of elite Guardians, is to eliminate Nod from existence once and for all. The destruction of Nod is the only way to prevent a global nuclear disaster. Will you deliver the last blow to the Brotherhood's last bastion? Are you prepared

What's new in Dungeon Bosses:

Rework 9/26/17 9/25/17 - FM20 Farmer's Garden farming has been Reworked in a way, that farmer's can unlock anything that they grow to any special festivals, provided that for example they go to the special festivals with the "Farmer's Special Vehicle". To unlock the special effects, the farmer now needs to go to the special festival with the statue of that particular Special Event, and of course the Captain who will go over the event will base this decision off the Prestige the farmer has achieved. 9/24/17 - Jans works on the initial Jans Questpack There's not much to update on the initial Jans questpack, with Jans already started working on it a lot more, and there's a few minor fixes with the abilities, and inventory and stat upgrades. 9/23/17 - More about the Jans quest pack Jans continues to work on our Jans questpack and it is almost ready now, with more improvements and even one new ability being included into the current version that is almost ready. 9/21/17 - 18L is ready for FM13 The Mod team worked hard on getting L18 up to spec, more custom assets and improved abilities for the setting. We also managed to lower the market value of L18 from 3,000,000 to one million marking a good price for all year long. The Mod team also have made some cool improvements to the 18L mod truck, the interior has more custom assets while the exterior is closer to the existing truck models with also some custom assets having been added to the front section of the truck. Some of the truck parts have also been changed but we will say more about this in the next few days. This mod has been ongoing since last year but the final spec is now it's current version. 9/20/17 - More news on the Jans quest pack Jans is working on the Jans questpack now and he is currently discussing about the possible additions that might be in the final version of the pack. And if you have some valuable suggestions, please note that the discussions are open to everybody. 9/19/17 - Good news for all of you who have K12 access One of the few mods that haven't had any progress done on this years question season is the K12 access mod, it is

For information about the full version and "when I was young" game, visit the official site - For the full version, which will be available in the U.S.A., visit the Steam store - Licence: Steam Trading Cards, or things like it, are CC-licensed. This means that, yes, you can use the image of J.R.R Tolkien, but you must give them credit. If you think I might have wrongly credited you, let me know. More about the license can be found here.," says Babbage. "So I think the potential of a Google the size of Wikipedia is less about the number of servers and more about the ideas and the community." Online encyclopedia Wikipedia has been accused of ruining the English language with its self-help pages, which may explain why some 40,000 Brits have signed a petition demanding its removal. The online encyclopedia is seen as a threat to established businesses as it undercuts their ability to spread lies about the world. Google's approach to the commercial online encyclopedia is very different to Wikipedia. Instead of crowd-sourcing the information it will rely on an army of employee Wikipedia editors and special search algorithms to compete with competitors such as Yelp and Yellow Pages. For now, however, the project is just not ready to meet the demands of everyday Wikipedia users. The plan is to have more than 100,000 people working on it by the end of the year and one million in 2011. To get around the speed problem and the fear of damaging the site, Google's team hopes to relax the rules around editing and allow users to edit right from a new 'rubber stamp'
