Mage Drops is a game set on a majestic fantasy world in a steampunk setting. In this battle-filled game, players can create a new class in Magics and Magick by collecting and crafting an assortment of highly sought after rare and unique items. Conquer the world alone or with other players in competitive or co-op multiplayer modes. Storyline: After many years of a long and historic struggle, the science of the witches - or wizards - is finally coming back to the surface. By gathering the needed materials and reagents, they can now create powerful artifacts and perform magical effects. Using their abilities, players can shift and augment the elements to gain control over them. On land, in the skies or underwater, explore a vast fantasy world to unlock new areas, secrets and battles. It all starts here - the fortress of the evil sorcerer, Ors. Mage Drops is inspired by the settings and art style of games such as Age of Conan, Diablo 2 or Diablo 3, World of Warcraft, Terraria, Minecraft or Terraria: Adventure, as well as dark fantasy sources like Grimrock, Ultima Underworld and the works of H.P. Lovecraft. Mage Drops embraces roguelike elements, pixel art, third-person perspective, and a quick and challenging gameplay to create a unique experience for gamers. Features: Battle-centric gameplay Mages are magic-wielding adventuring beings. They are creatures of death and destruction, using their unique Magicks and Magickal artifacts to perform spectacular attacks and destructive effects. Players explore a world of traps, monsters and, of course, other players. Pick-up and play: There is no need for a complicated gaming setup or to download additional programs. Players can jump into Mage Drops seamlessly on any of their favourite platforms - Windows, Mac, Linux or Android. Clan vs. Clan Battle: The opposing teams consist of four players each. With the help of Magicks, Allies and Magickal Artifacts, players can now fight in a team of up to three players in a wide range of different modes. By switching between the four players on the screen, the game offers you multiple different strategies in Clan vs. Clan battle. Different difficulty levels: Once you get the hang of the game, you will be able to master the high difficulty levels - maybe even the hardest ones, too! The ability to control and manipulate the elements: As a highly customisable warrior, you will not only be

BREAKING NEWS: Chris Norway reports from Chile to southern South America As the North American hurricane season of 2005 comes to a close, Chile will carry on its Easter holiday for seven weeks of skiing and Easter festivities. However, those who ventured to the Southern Hemisphere in search of the weather will feel they got much less of their original travels desires. Hurricane Dennis ravaged Puerto Rico and Cuba with destructive winds and torrential rains, and the U.S. will again ponder whether to become another victim of extreme weather effects after Hurricane Katrina devastated New Orleans. El Nino weather will also be a serious challenge to Chile and other countries that depend on ocean and river trade. Although the snow is still pretty greenish from the Pacific Ocean, the main storms that have hit Chile in the last two weeks are tropical in nature. A powerful typhoon and resulting storm in the Pacific pushed in the northern coastal areas, arriving as a once-in-a-100-year wave that has left two homeless people dead and about 20 others missing. Fortunately, the rescue efforts were successful as 3,000 fishboats turned out to help in the search and recovery from the Pacific. In the Pacific Ocean, a strong typhoon settled in the Chiloé Archipelago, near the border with Argentina, on April 24. An area

Kavkaz 1804 is a game of set Europe since by the 19th Century, which is played out in the mountains of the Caucasus, on the territory of Russia and Iran. The game covers the period between 1804 to 1820, year. The game is a territorial game, the only player who can change the game to other parameters is the player who may come up with the event card. While the game lasts, the player represents a khanate, or confederation of khanates. The player and his forces represent the other khanates and his forces. The Russian Imperial forces are represented by a small imperial force, while the Persians are represented by the Khoảng Định Khanate and the Zirids. Finally, the territories where the player can move his forces are presented on the map in a hexagonal format. All khanates are represented on the map by their respective capital cities. Each turn represents about 6 months, or 6 turns of the game. The player may purchase troops to join his army with at the time of the game setup. The player needs to represent to other players the number of troops he has
