April 18, 2018byYuya SuperCat works but it has some bugs. For example, the options do not display correctly on some devices, but show OK on my MacBook. Some say that SuperCat is suitable for beginners, but I would not agree with this claim. There are too few options on the app in the product. In addition, it needs a more detailed and user-friendly interface. July 31, 2016byRizzo Good Brilliant August 23, 2014byFlyeye I've been using it as a backup of my iTunes library for a few years now. It's fast to check out a backup location, easy to use and has a bunch of useful features that I don't see elsewhere. May 27, 2014byTestUser I've been using SuperCat for about two years. I have a MacBook and an external hard drive (usb). SuperCat allows me to backup

### What's New In SuperCat?

✓ Scan entire hard drive, or any directory ✓ Built-in zip function ✓ Create, edit, organize and compare various types of files on your hard drive ✓ Check for duplicate files ✓ Export results as csv, xml, pdf, rtf, word, html and ms excel As an add-on program, SuperCat can be configured to run in the background and turn on when you boot your computer. With just a few clicks, you can add a new catalog, open or manipulate it, and then unload it. SuperCat supports two catalogs so you can compare two different lists at the same time. You can organize each catalog into any subdirectory, and name each one with any useful description. Features: ▶ Scan & catalog entire hard drive, or any directory ▶ Built-in zip function ▶ Create, edit, organize and compare various types of files on your hard drive ▶ Check for duplicate files ▶ Export results as csv, xml, pdf, rtf, word, html and ms excel ▶ Configurable to run in the background and turn on when you boot your computer \*\* Absolutely no need to mess up with the registry or lose any data\*\* Who says you need to waste time looking through hundreds of fragmented and hard to find registry entries in the Registry Editor? We did. However, when you only need to care about a few settings, such as applications to open specific directories, it can be much quicker to use regedit.exe. Unfortunately, regedit comes with a big drawback - it can cause some serious troubles if it's not backed up. But, some people are okay with losing a few data, as long as they get the job done. Therefore, we've created a short tool called "DataLoss" that helps you not lose any of your favorite settings. It generates a backup of your entire registry key at once, copying them to a specified location in your computer. You can select whether to overwrite the original registry, or create a new one (default option). It works fast and takes just a few seconds to restore even a large list. Just configure the configuration settings below: Configuration Settings: ▶ Source location - Choose where to backup the database ▶ Destination - Select a proper location to store the backup file ▶ Overwrite - Choose whether to backup the actual registry or just the value ▶ Run on startup - Turn on the automatic backup option If you have any
