The game is a turn-based strategy game featuring a dynamic action camera, meaning that the camera is not static but follows the gameplay in real-time. The scope and capabilities of the camera are unlimited, from the simple setting of a static zoom to fully dynamic movement. An adjustable sensitivity setting allows the player to adjust the frequency and intensity of the camera shake, but not limit the camera view. The player's vision covers an area in front of the camera, while an automatic timer keeps the camera moving. The camera can be moved, rotated, and "panned" in all directions, but cannot be moved vertically due to a technical limitation in the game engine. The horizontal field of view is adjustable, starting at 90° and ending at 50°. Key Features: The game includes the following features: * Play single or multi-player on a map editor with a built-in unit editor * Automatic camera movement * Real-time camera shake frequency * Adjustable camera sensitivity * Adjustable camera zoom * The game includes a selection of level generation tools * Built-in unit editor * Autosave system * Multiple save slots * Save in the level editor * Character screen and level designer * Available keyboard and mouse controls * Can be played on Windows, macOS and Linux * Can be played offline and on a limited online mode. By the game, I'd like to say that NPC can make your inner wanderings in its company arrive with a right belief. They are more extremely mischievous, full of plague, dignified or stealthy, diverse, and unique. From **lugg gulpes** to **perlevent navis** and **bosses**, there are many options of NPCs. You can select which one would you like to interact with and depart the game.

The Act is the first episode of the game. You have to survive in the situation of a child in order to get a job in the Sanctum. A maiden enters the common areas before getting struck by a homeless woman's slipper. Hence, you have to enter into action for saving the maiden. As the result, there is an opportunity for the dialogue and the emotion change to the heroines.

The story of second episode can be told by a single and two heroines. They are very special to each other. I hope the story can be read easily. Moreover, in the 3rd episode, like in the 1st episode, you can learn more about Heroine's own story and the past-life. As the result, in episode 3, more emotion and dialogue are possible.

The initial story, then the story after the starting in the second episode, ended the story without giving a long ending. So, in order to finish it, I've made a small addition.This add-on has 3 options. In the first scene, I can prepare you to feel the anxiety which presides the beginning. The mother is dead-house. The grief are resonate throughout the town and the distant areas. It can be argued with a gulp of emotion. Therefore, in the 1st scene, my thoughts move to the anxiogenic rate of parental death.
