
[FS9 FSX] Aerosoft - Mega Airport Paris Orly V1.01 Game

With just shy of 26 million passengers using the airport in 2007, Orly is one of France's biggest airports, second in French passenger traffic only to Charles de Gaulle airport. The airport, which is owned and run by the French state, is situated in southern Paris on the left bank of the Seine and straddles the commune of Orly-Villeneuve. The area has been the airport's home since its opening in 1932, but it has recently been expanded to improve the general airport facilities and expand the aircraft movements outside of the city, to increase flights, and extend the runway. Conclusion by Avsim.com: Since the first release of Orly Airport V2, Aerosoft have been steadily improving the appearance, performance and functionality of this great looking airport. The two latest versions feel very similar, but the configurator tool has seen some changes allowing us to customize every object in the scenery with ease. It's fantastic. This is a very detailed and high quality airport scenery and is a great addition to your scenery collection. Paris Orly Airport is the 3rd largest airport in France and the second busiest after Charles de Gaulle. It is also the largest airport in Europe with a daily passenger traffic of 26.7 million in 2007, or 51,4 million a year. When flying from Paris to destinations in France, the airport is served by the Orlyval line and cross airport bus which connects with RER Line 1. It is the largest hub airport of the RATP Group of RATP, with connections to RATP trains throughout France. It is also served by many European intercontinental flights.
