Hp Drive Key Boot Utility Windows 7 64bit ((BETTER))

[Download](#)

---

Connect the selected USB drive to the computer where the HPUSBFW resides. Run the HP USB Disk Storage Format Tool by double-clicking HPUSBFW.EXE in Windows. Select the USB drive you want to create an installation disk for and click the Format button. An Explorer window will appear showing the partitions of the USB drive. Select the partition for which you want to create an installation disk and click Continue. In the Select Image window that appears, click the Browse button and select the image directory in the folder located on the USB drive. If you decide to use a bootable flash drive, you will also need a Windows OS image. Click the Start button.
