Google is now rolling out a feature that will make online shopping more convenient by giving you the ability to send a link to one of your purchases directly to your Google Account - more commonly known as Gmail. Now, in order to access this convenient feature, you will need to have Gmail installed on your Android device. Once you have your Gmail account logged into your device, simply visit the "Send to Gmail" section in your Android settings and choose the Google account you want to store the link to your purchases. This is a great tool for keeping an eye on your child's spending as you can set up an account on your child's Google Account for you to view all purchases made on their phones. So, if you have any questions regarding this amazing Google update, feel free to drop them in the comments section below.

Key Features:

1. It will be easy to scan and send all your local files to a new digital storage
2. An original and safe solution to encrypt files and folders without using online services
3. Supports an unlimited number of files and folders, even more than the number of documents.
4. You are free to choose whether the original name is added to the output folder
5. Easily manage the files and folders that you would like to copy from your PC to the new digital storage.
6. The output folder will be kept in a safe place on the cloud.
7. The output folder can be shared with your family members.
8. You can easily transfer the output folder by e-mail
9. It is easy to password-protect the output folder
10. It is very convenient to monitor the storage space of the output folder on the cloud.
11. You can share the output folder on social networking sites.
12. You can share the output folder with your friends and family members
13. It is easy to choose the desired output folder name
14. It is very easy to import the output folder to a new PC
15. It is very easy to password-protect the output folder

What's New In Roboscan Internet Security Pro?

Kaspersky Anti-Virus Pro is the world's most popular anti-virus tool. The package offers strong protection against viruses, spyware, adware and other malicious software. Kaspersky Anti-Virus Pro is a simple and reliable security software, yet it is packed with numerous advanced features. What's more, Kaspersky Anti-Virus Pro for Windows only costs \$59.99! Technology is fast moving and with each passing day we get more and more exposed to the risk of computer infection. Therefore it is necessary to use powerful anti-virus tools that will help you keep your system free of viruses, trojans, and other malicious software. F-Secure Internet Security 2011 Pro is a modern, easy-to-use package of all the essential security tools you need to keep your computer safe from online threats. It's a suite of multiple tools that address different threat categories: • Anti-virus • Anti-spyware • Anti-spam • Firewall • Privacy Guard • Parental Control And also allows you to use the system as a proxy server You can connect any number of computers to the system via the built-in VPN (Virtual Private Network) with seamless switching between them. To keep your system clean and safe, you need all the tools working at the same time. Fortunately F-Secure Internet Security 2011 Pro has them all in one place, and offers easy and quick access to every tool, even with its high security level. It comes with F-Secure Internet Security 2011 Standard, which includes a robust anti-virus protection and a suite of tools to protect against worms, spyware, and viruses. FeedReader Pro is the program you need to manage all of your RSS feeds, both on your desktop and mobile device. FeedReader Pro is the easiest way to read and manage your RSS feeds from any device: on your PC, Mac, or mobile device. Real-time virus scanning The best way to keep yourself protected against viruses is to have them immediately detected and disinfected as soon as possible. The good news is that the Windows OS provides such an ability out of the box. It is also crucial to have all your programs upgraded and patched as

soon as possible, to make sure that the viruses and other malware are detected and neutralized as quickly as possible. Real-time Scanning
But the scanning time on an average computer can be too long, especially if you have many files in the computer, so we need a virus scanner which would scan the entire system and report any viruses immediately. Luckily, Real-time Scanning is one of the core functions of Skanning PC Security and you can rely on it to instantly detect and remove any type of virus. A Better, Simpler Interface
