What's New In ScrambleOnClick?

Scramble OnClick - Key Encryption and Decryption Tool Are you using the Clipboard too much and do you worry about the risks it might present? Scramble OnClick was developed to provide users a tool that can encrypt the text strings they copy to their clipboard and ensure they can easily decrypt them back. Scramble OnClick will be useful for people who often copy text strings from internet websites to paste them in various text editors, or simply because they feel more comfortable when data is not accessible and can only be read by an approved person. Scramble OnClick was developed to provide people with the means to quickly and effectively protect the text strings they copy to the clipboard from being accessed by unauthorized users. Scramble OnClick was developed to provide users with a tool that allows them to easily decrypt the text they are about to paste from their clipboard. For the sake of simplicity and convenience, Scramble OnClick has been developed using the following keywords: Easily Quick Safe Key-based Simple Unobtrusive Secure User-friendly Light Compact 2 Versions: Scramble OnClick - the universal application for safely storing, decrypting and encrypting copied text Scramble OnClick - the portable version of the software, ideal for people that often copy text from internet websites to paste it in various applications. Key Encryption Scramble OnClick will offer users the means to quickly and effectively protect the text strings they copy to their clipboard from being accessed by unauthorized users. By using a predefined key (master password) and a simple key generation wizard, Scramble OnClick will allow people to easily and quickly encrypt the text strings they copy to their clipboard. The working principle of the Scramble OnClick will be that of text encryption. To this end, the utility will copy the clipboard text and on demand, it will encrypt it using a user-defined key. Scramble OnClick features a tray icon area and a predefined hotkeys, both will allow users to encrypt the text strings they copy to the clipboard. Scramble OnClick will encrypt the text by using a key that is generated randomly at the time the application is initiated. This key will be used whenever the utility will apply changes to the text string it encrypted. Password strength will be assessed and users will be able to add custom hints to the master password. It is highly recommended to generate a different encryption key for every PC, laptop, tablet or mobile device that the application will be used. This will allow the users to restore their text strings to the original state after they forget their master password. However, although Scramble OnClick offers a password confirmation for altering the encryption keys, it fails to offer similar protection for the

System Requirements:

Windows 7/8 1GB of RAM 1GHz Processor DirectX 9.0c compatible video card (or DirectX compatible) 4GB of free hard-drive space DVD-ROM drive How to Install: In order to play Aero Hunter 1.1, download and install the HLS file (DMG file) from the link above. Unzip and install the application onto your hard drive. Enjoy! Developer Information: A
