### Death Angel - Donation Crack + Download [Updated]

Game "Death Angel" is the first and only original IWAD created with the engine "Asteroid Base". It's the cheapest model of the ship - 99,99 cent. Everything there works great (no bugs) - every ship has it's own unique abilities, weakpoints and weapon system. I wanted to show you how it works and all the ideas behind it, so I could gain enough experience to do my next project. We always have to learn from our mistakes and have some trial and error - don't be afraid to try new things and ideas. This game is optimized for speed and not on gameplay. You will not find a lot of tactical questions (though there are them), but a great amount of space battles in a short time. It's one of the most dynamic things of this game, so if you're interested in space battles, and the genre "shooter" - buy this game. Using the downloader is free and you can use the trainer "Asteroid Base" - to open your games. For this game, you will need to put in the data folder. The downloader needs to be installed on your computer. This is for 2 players, you will need to have two modems or two computers (two keyboards and two joysticks) - with two people playing, to work properly. "Asteroid Base" (trainer) with downloader: In this game - you will be able to open any file, and connect to any server with full control. If you have any problems with the downloader or trainer - just ask! Note: Some of you (even the authors of the games that were downloadable from the store) have asked about their games for the price. We always see the price of the games as a collector's item - so don't be surprised that this is so low. We believe that this price is more than fair and we are not trying to sell our games at these prices. What is happening is that we have started to include some game related pictures inside the egg. We can easily get any picture we want with our free time. This was a very nice idea from this costumer. We have selected some nice ones for you. Have fun with your game!
