If you have installed AutoCAD on a 64-bit operating system, the installation will appear as a 64-bit program (AUTOCAD 64). The license costs for both 32-bit and 64-bit AutoCAD are the same. With AutoCAD, you can design 2D and 3D images, such as architectural plans and floor plans, use technical drawings, write technical documents, and produce publications. I want to get the month number from a date. If I use dateComponents.month to get month number it doesn't

show the expected value because of the day being added as part of the month and month is added up to 12 and does not consider the day. I tried var month = (dateComponents.month?? 12) But this does not work. A: Try this - let currentDate = Date() let currentMonth = currentDate.dateComponents(.month, from:.current).month?? 0 let currentYear = currentDate.dateComponents(.year, from:.current).year?? 0 And you can access the current day by using let day = currentDate.dateComponents(.day, from:.current).day?? 0 (ns pitchfork.file (:require [pitchfork.core :as pf] [pitchfork.filter :as f]) (:refer-clojure :exclude [parse])) (defn parse-file-opts "Parse the given options and return a map of option names and values." ca3bfb1094
