Translated in English by CRASH 7, [FSX] Blackbox Airbus Xtreme Prologue [FSX - P3D] HighQuality FSX Xtreme Prologue FSX Blackbox Airbus Xtreme PrologueQ: What is the minimum 1-30 second delay between points on a segment? I just started a project where I need to send notifications to testers. Each notification will contain a point, and each tester should receive all notifications within the 30 second window they specified. What is the best way to ensure that the notifications are sent all within the given window? The time between individual points will vary, as they come in several second intervals. I am using SignalR for messaging. A: You'll have to keep track of the last time you've sent the last point. In between, you'll have to send a msg so that the receiver knows where he/she is in the message. For example: public void NotifyTester(Tester tester, Point p) { TesterSnapshot testerSnapshot = new TesterSnapshot(tester); ... // show notification ... // record timer and fire off subsequent
