Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had more than 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children.

Not every website offers Robux, but if a website does, it almost certainly means they offer free mobile games as well. We assume that you are already signed up to the website, if you are looking at this website you probably already have a Robux account with that website. Most websites that offer Robux will offer you free Robux to get you started, if you are a new player, but there are some websites that give you Robux just for playing free games. Although there are websites that ask for your Robux information, we don't recommend this. If a website asks for too much information, like a SSN or bank account number, you should just find a different website that does not ask for your information. The information that you get from Robux websites can help that website keep you as a player, so it may be in their best interest to know as little about you as possible.
