Don't believe all you see on Facebook and are surprised when your 10vo boy friend â€~likes' some vile photos. It seems most of the world's top creators, actors and actresses under 19 year old's like to create and post naughty photos of themselves. Even more comical is the â€~likes' produced for their friend pages. Recently Yahoo News ¬ reported that Instagram has removed 600,000 photos of minors from its site. And if you search Snapchat, Twitter, Vine and other social media sites you'll see the same age ( under 16 year old ) photos.. Although this isn't a conspiracy theory, these sites will happily offer free advertising for parents and social services ( you can install apps for your phone that make it easier for you to monitor your child's activity, or see who they are â€~tagging' in the images they post (there is a free alternative to Instagram, called  $\hat{A} \neg Snapchat \hat{A} \neg$  which is not as popular ). The point is that kids are sharing their naughty photos and videos and it's a free for all. While the majority of â€~likes' are innocent and are shared with friends, many are inappropriate and some are downright shocking. One of those is a photo of a 13yo girl in a playboy bunny pajama set exposing herself, while her friend's 14yo boy friend laughs in the background. Another is of another 13yo girl in a thong, leopard print, with her pubic hair shaved off, lying in bed with the words â€~Your Mom's Dog' written at the top, while another 10vo girl is having graphicÂ. A marine plant is an organism that lives in a marine environment. It is distinguished from terrestrial plants by having a life cycle that alternates between periods of activity (when growth and reproduction occur) and periods of dormancy (when growth and reproduction cease). It differs from other marine plants in that it is able to take up dissolved nutrients from seawater. This ability, which is exclusive to the phytoplankton, confers a competitive advantage in nutrient-poor marine environments. However, in nutrient-rich environments, phytoplankton may become dominant, depleting dissolved nutrients, in
