F-Secure is the company that brings us security software for our computer. A few days ago I bought F-Secure 5 for 699 \$ and I downloaded and installed it on my computer (I use Windows7 with SP1). Then I've realized that when I click on "more info" to activate the License Key I get the message that this key has been already used in my computer (I think it is the same with every F-Secure Key! Isn't it?)... I tried different Keys, but it doesn't work. Any suggestions? A: You can try using the Generate license key. Once the installation is completed, select the license key option on F-Secure Main Menu. The correct key should be auto generated by the app. For the first time since the 1960s, the no.1 race in the Formula 1 world championship will not be won by a two-time world champion. Following nearly two decades of domination from Michael Schumacher and seven-time champion Fernando Alonso of Renault, the spotlight will now fall on 20-year-old Max Verstappen from the Dutch team Red Bull Racing. Verstappen, who won his first Grand Prix this year in China, was the form driver in qualifying for the Belgian Grand Prix on 11 May. With his last-lap, daring pass
