## Parent Directory Index Of Private Images

A: Problem was resolved by adding a condition to the loop: `post_parent; if($parent) include( "Media.php" ); ?> ID, "meta-key-here", false); $post_type = 'post'; $taxonomy = "category"; if ($parent) { $taxonomy = array_change_key_case($taxonomy, $parent); } $taxonomy_args = array( 'child_of' => $parent ); $terms = get_categories($taxonomy_args); $terms = wp_list_categories($taxonomy_args); foreach ($terms as $term) { if ($post_type!= 'page') { if ($term->term_id == 10) { // this condition was added. $img = $term->cat_name; //cat-name was switched to //dir-name, see post.php } } }`
